Hi Everyone,

Ex. 5 - Deliberative Process

Ex. 5 - Deliberative Process

- From the FEIS, the “Phase 1” of the project will be from (west to east), I-25/I-70 interchange to Chambers Road. This will now be called the “Central 70” project. This section of the project will contain only one “managed lane” (toll) in each direction with the potential to have two lanes in each direction in the future.
- The ROD will explain and contain information to show the changes from the FEIS; there will be no Supplemental FEIS.

Subject: Conclusion of the PM10 conformity consultation between FHWA and EPA for the South Mountain Freeway project

Hi Rebecca-

I spoke with Alan Hansen this morning regarding the additional air quality comments EPA had sent on both 8/19 and 8/6, and he confirmed that all of the comments are being addressed by FHWA, and the Air Quality Technical Report revised accordingly. With that information, this concludes the PM10 conformity consultation between FHWA and EPA for the South Mountain Freeway project. We'd like to thank FHWA for working so closely with EPA to address our concerns, and we look forward to reviewing and providing comments on the Final EIS when it is circulated for review.

Please see the attached spreadsheet for a summary of the consultation (comments and responses) that has taken place between EPA and FHWA since we received the Air Quality Technical Report on 6/2/2014. If you have any questions or notice any revisions that should be made to the summary, please let me know.

Thanks,

Clifton
